

Filtek™

Bulk Fill
Flowable Restorative

The bulk fill flowable that's easier to inject.

3M™ Filtek™ Bulk Fill Flowable Restorative is available in an ergonomic syringe designed for comfort and easier injecting.¹ This gives you more control and visibility for precise placement in deep restorations.

Reduce bubbles and waste

Virtually no bubbles or material “run-on” during dispensing gives you better control.^{2,3}

No more guessing

The green syringe barrel indicates the remaining material volume. When your syringe is empty, only the white plunger shows.

Bendable cannula

Easy-to-bend without kinking for better access.⁴

Easy to hold and inject

Triangle finger plate and plunger make it quick and easy to your grip.^{5,6}

Key benefits

- Virtually no bubbles or material “run-on”^{2,3}
- Easy-to-bend cannula for improved access⁴
- Ergonomic design is easy to hold and inject^{5,6}
- Injectable, one-step placement up to 4 mm⁷
- Excellent adaptation and low shrinkage stress⁸

Can be warmed for injection moulding

Warm up to 70°C for up to one hour, up to 25 times.⁹

Posterior restoration made simple

Prepare the tooth and apply an adhesive e.g. 3M™ Scotchbond™ Universal Adhesive.

Dispense up to 4 mm of 3M™ Filtek™ Bulk Fill Flowable Restorative into the prepared cavity and cure, e.g. with 3M™ Elipar™ DeepCure-S LED Curing Light.

Place a 2 mm (minimum) capping layer of an aesthetic composite, such as a 3M™ Filtek™ Universal Restorative, and cure.
