

CURAPROX

PERIOPLUS⁺

CHLORHEXIDINE WITH A NATURAL BOOST

We'll get straight to it, with Perio Plus+ you get an all-new range of chlorhexidine mouthwashes which contain CITROX® – the natural bioflavonoid extract of bitter oranges.

The combination of CHX and CITROX® is more powerful than CHX alone. CITROX® has been proven to improve the efficacy of CHX. CHX, with minimal adverse side effects and a pleasant-tasting solution that ensures patients' sense of taste remains intact.

TREATMENT COMPLIANCE DONE RIGHT

Chlorhexidine is fantastic, but it is important that patients actually use it. Now there is Perio Plus+, which combines CHX with something your patients will no doubt very interested in, great taste and no impact on the sense of taste. It also has what you're interested in – exceptional efficacy. Perio Plus+ contains CHX as well as CITROX®, consisting of nine natural bioflavonoids extracted from bitter oranges. Why? Because it has been proven that CHX and CITROX® are more effective than CHX alone.

Perio Plus+

- CHX in proven concentrations for mouthwashes, gel and toothpaste
- In combination with CITROX®/P-Complex: the natural bitter orange extract for increased effects and the amino acid polylysine for substantivity
- With the copolymer PVP/VA for an extra strong protective film on the mucosa and teeth
- With xylitol for a pleasant sweet taste, protection against caries and strong teeth
- Controls and delays the build-up of biofilm (plaque regrowth)
- Ensures patient compliance thanks to a pleasant flavour developed by Givaudan
- No impact on the sense of taste
- The discolouration typical of CHX is minimal if used properly
- No alcohol

Chlorhexidine – tried and tested

For over 50 years, CHX has transformed dentistry, especially when it comes to periodontology and oral surgery. CHX has been the gold standard, despite its unpleasant taste, enamel discolouration and disruption to the palate. Although these side effects are reversible, it does mean that treatment compliance could be improved.

CHX with the power of nature – Perio Plus+

What is more potent, CHX or CITROX®? Malic et al. investigated this question in 2013*. The results are staggering: CITROX® is shown to be more effective than CHX. However, the combination of CHX and CITROX® shows the best performance of all, which is exactly why Perio Plus+ combines CHX with CITROX®. Thanks to this enhanced efficacy, Perio Plus+ can, if appropriate, be dosed at a lower CHX level.

*Malic S, Emanuel C, Lewis MAO and Williams DW. Antimicrobial activity of novel mouthrinses against planktonic cells and biofilms of pathogenic microorganisms. Microbiol Discov. 2013; 1:11. <http://dx.doi.org/10.7243/2052-6180-1-11>

Protective film, anticaries

The copolymer PVP/VA has proven to be particularly mucoadhesive and therefore highly effective. The birch-sugar xylitol provides both a sweet taste and protection against tooth decay. This is why we use both PVP/VA and xylitol in Perio Plus+.

• Prevention and patient loyalty tip

It is recommended that patients avoid consuming tobacco and highly discolouring foods during treatment: coffee, red wine, juices, green and black tea, berries, cherries, saffron and curry. Thanks to the strong effect of Perio Plus+, you can, if appropriate, lower the dosage or even reduce the duration of use. Both options further limit discolouration. And, of course, in addition mechanical cleaning will also help.

CITROX®

What is CITROX®?

CITROX® is a natural bioflavonoid extract of bitter orange (*Citrus aurantium amara*). These bioflavonoids have a natural yet powerful effect.

Over the last few decades, CITROX® has established itself as a preservative in the food industry as well as in surface applications, including for the disinfection of medical facilities.

This has attracted the interest of a number of dental professionals, leading to the 2013 discovery by Malic and her team: as a natural yet powerful substance extracted from bitter oranges, CITROX® enhances the efficacy of CHX.

CITROX® is a real winner and it's completely natural.

PERIO PLUS+ IN THE TRIED AND TESTED CHX CONCENTRATIONS

Perio Plus+ is the new CHX range from CURAPROX. It combines CITROX® with CHX in the tried and tested concentrations of 0.05 to 0.09 % – in Balance and Regenerate mouthwashes, Focus gel and Support toothpaste. This new range harnesses the power of CHX in combination with CITROX®.

Perio Plus+ Regenerate Mouthwash

Active ingredients

- Chlorhexidine 0.09 %
- CITROX®
- Hyaluronic acid
- Xylitol
- PVP/VA
- Polylysine

Thanks to the addition of hyaluronic acid, Perio Plus+ Regenerate accelerates tissue renewal, particularly during the healing process.

Perio Plus+ Balance Mouthwash

Active ingredients

- Chlorhexidine 0.05 %
- CITROX®
- Sodium fluoride
- Xylitol
- PVP/VA
- Polylysine

Perio Plus+ Balance reduces the risk of caries and gingivitis for:

- Wearers of orthodontic appliances
- In cases of treatment-related dry mouth
- In cases of motor impairment
- For long-term use

Perio Plus+ Focus Gel

Active ingredients

- Chlorhexidine 0.5 %
- CITROX®
- Hyaluronic acid
- Xylitol
- PVP/VA
- Polylysine

With the highest dosage of CHX, Perio Plus+ Focus inhibits inflammation caused by implants and dentures and protects against periodontitis and peri-implantitis. It also contains hyaluronic acid to ensure accelerated tissue renewal.

Perio Plus+ Support Toothpaste

Active ingredients

- Chlorhexidine 0.09 %
- CITROX®
- Sodium fluoride
- Hyaluronic acid
- Xylitol
- PVP/VA
- Polylysine

Perio Plus+ Support is free of sodium laureth sulphate (SLS), thus ensuring the success of CHX treatments.

PERIOPLUS⁺

Perio Plus+ Regenerate and Perio Plus+ Focus gel With hyaluronic acid

Hyaluronic acid is especially beneficial for the healing of wounds. Hyaluronic acid moisturises the upper layers of tissue, promoting growth and stabilisation of the tissue, reducing the risk of complications and accelerating the healing process. This is because hyaluronic acid facilitates cell migration and proliferation, promotes the formation of granulation tissue, combats inflammatory processes and accelerates re-epithelialisation.

Perio Plus+ Regenerate mouthwash with hyaluronic acid can be used over long periods of time, thanks to only 0.09% CHX. Perio Plus+ Focus gel with 0.5% CHX also contains CITROX® and hyaluronic acid and is suitable for precise local applications for up to ten days.
