Time to go hybrid... EQUIA Forte™ HT

What are Dental Glass Hybrids?

Glass hybrids are fluoroaluminosilicate glasses reinforced with a second smaller, more reactive silicate particle. This composition provides better control of setting reaction and enhanced mechanical properties. Products like EQUIA Forte HT use a unique high-molecular-weight polyacrylic acid for superior mechanical properties and improved handling. According to GC, dentists have placed more than 15 million glass hybrid restorations in Europe as of 2021.
