Sectional Matrix System Starter Kit

The UnoDent Sectional Matrix System helps to produce high-quality, anatomically accurate Class II composite restorations. The system includes a molar and premolar ring, four different size matrix bands, and three wedge sizes. The nickel-titanium ring is strong with stability that exerts optimal separation force on the teeth to produce the best contacts.

- Best ring design for wide cavities
- Outstanding spring strength and elasticity
- Optimal force for tooth separation
- Spring allows for easy stacking of multiple rings
- M-shaped tines and profile-matching wedges
- Two rings: Standard for large teeth and Narrow for small teeth
- Stable in forceps when placing at site
- Very stable on the teeth
- Autoclavable

MPU000
